Do you think your device is cleared of your information because you restored the operating system or reset the factory settings? **THINK AGAIN.**

Just because you can't see it doesn't mean that it is not there! **Thieves know it is there** and can't wait for you to toss that cell phone, iPad, laptop in the garbage. When they find it **they are going to know your entire life!** You will become another statistic of **STOLEN IDENTITY!**

Commonwealth Computer Recycling wants to help you make sure no one can steal your identity by **SHREDDING THAT HARDDRIVE.**

Take that thieves!

Bring your device on January 2nd and CCR will remove the hard drive for you and properly recycle the item!
