Building Bridges

Many exciting projects are underway, from Chadds Ford to Honey Brook, as municipalities embrace the vision in the Strategic Action Plan (2014) and work to enhance the Greenway. [Click here for highlights](#) of hard work and accomplishments.

Each successful project has at least one common feature: **a project advocate**. A project advocate (citizen volunteer and/or municipal employee) assembles partners, secures funding, and tirelessly promotes a project. Does your municipality have an advocate who can help guide its land preservation, restoration, or trail project from concept to reality? Now is the best time to start planning, and staff at the Brandywine Conservancy can help advocates define projects for [popular grant programs](#).

Email sfleming@brandywine.org to discuss turning your municipality's Greenway vision into reality.

Mobile App Data Review

We reported in May that the Brandywine Conservancy is developing a mobile application (app.) for the Brandywine Creek Greenway that highlights outdoor recreational opportunities in public parks and preserves. Our summer intern and our GIS manager have worked diligently for the last two months to inventory and document park locations and facilities along the Greenway. [Click here to review the inventory and photographs collected to date.](#)

We need your help to review the inventory for completeness and accuracy. We also invite you to send us high quality photographs of public parks or preserves in the Greenway for use in the app. We will follow up with each Greenway municipality in the coming weeks.

Please send your comments and photographs to mdenlinger@brandywine.org by August 26th.

October 20th - Save the Date

Greenway Partners Annual Meeting

Thursday, October 20th
Downingtown Country Club

5pm appetizers and cash bar

6pm buffet dinner

7pm program

\$15 per person (help support the Greenway!)

More details in September!
